Includes

F Small Rail Endcap

D Level

E Large Rail Endcap

G Screws x3 *

H Drywall Anchors x3

*for use on drywall only

A Hooks x4

B Grip Locks x4
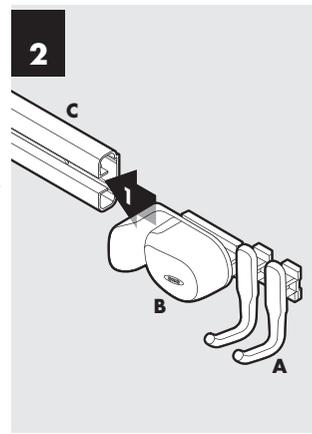

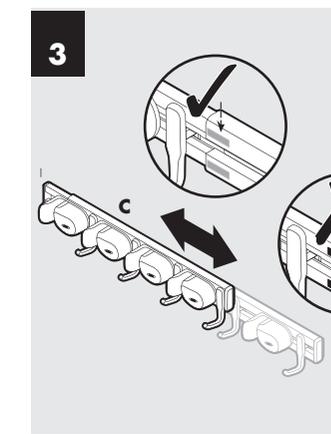

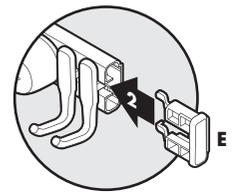

C Organizer Rails

1a

1a. To adjust configuration of the grip locks (**B**) and hooks (**A**), remove cap (**E**) on the right side of the organizer rail (**C**).

1b. Slide grip locks and hooks off.

1b

Note: You can also adjust configuration after installation by removing the cap on the right side and sliding pieces off the aluminum rail. (Assure you will have room to do this before installing.)
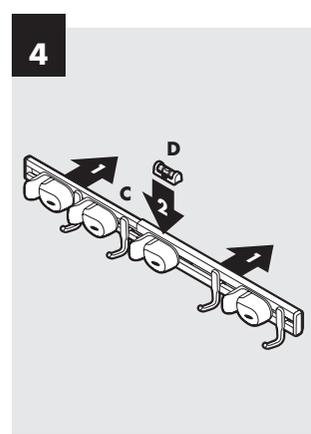

2

Slide grip locks (**B**) and hooks (**A**) back on in desired order. Reattach the cap (**E**) to organizer rail (**C**).
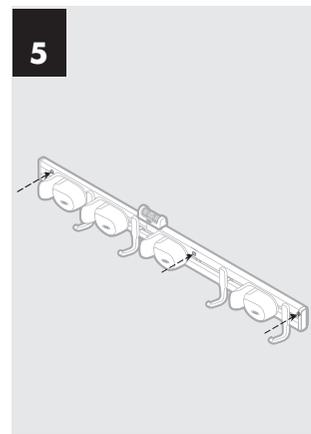

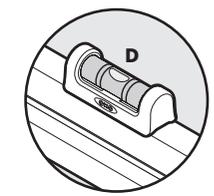

3

Adjust the organizer rails (**C**) to desired length for your space.

Important Note: Do not extend organizer past the point at which you can see the red indicator lines on rail. If you expose these red lines, retract rails until lines are covered again.

4

Place rails (**C**) against wall and place included level (**D**) along top of aluminum brackets to ensure the organizer is straight.
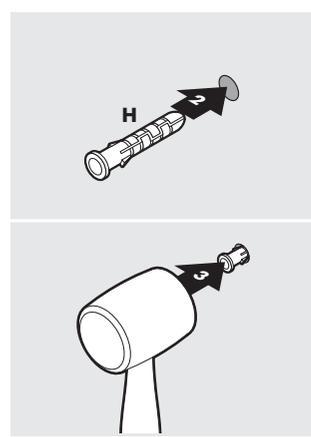

5

Use a pencil to mark the wall through the two holes at either end of the rails. If the third hole in the middle is visible, mark that too.
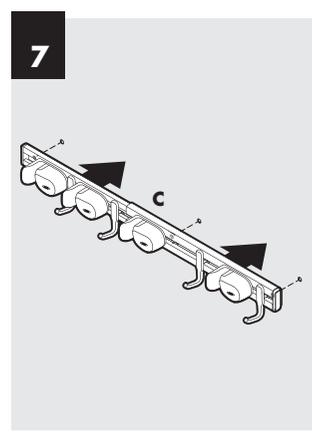

OVER ▶

6

Note: : These screws/anchors are for use on drywall. For walls of other materials, use the appropriate screws and tools.
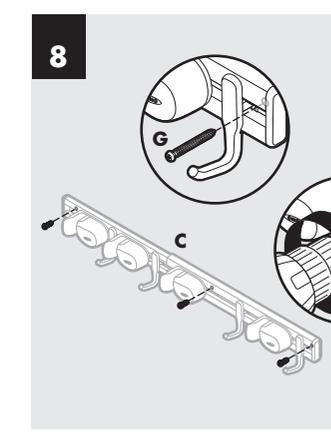

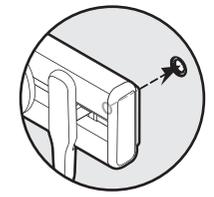

Remove organizer from wall. Drill pilot holes over the pencil markings (we recommend a ⅛ inch/3 mm drill bit). Drill out the holes with a larger drill bit (we recommend a ¼ inch/6 mm drill bit).
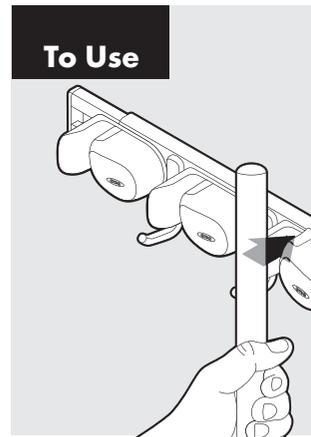

Place anchors (**H**) into wall and push in until flush with wall. If necessary, use a hammer or mallet to finish.

7

Align holes in rails (**C**) with holes in wall.

8

Attach rails (**C**) to the wall with screws (**G**). Gently pull on rails to ensure security before adding tools.

To Use

To use grip locks, simply press the handle of a tool straight into the grip lock toward the wall. The grip lock will adjust to fit the handle and hold tight until you simply pull to remove the tool.
